KEY GUIDELINES FOR AUTHORS

- **Abstract.** All manuscripts require an abstract not exceeding 100 words.
- **References.** A maximum of 35 single references is permitted; multiple references (referring to more than one paper) are to be avoided.
- **Figures.** The manuscript should contain no more than 5 normal-sized figures.
- **Length.** The manuscript should not exceed the equivalent of 2500 words, including text, tables and figure captions (approximately 12 double-spaced pages).
- **Disk.** Authors are required to submit a disk with an electronic file matching exactly the hard-copy of the final version of their manuscript.
- **Submission.** Manuscripts should be sent to one of the editors or preferably to a member of the advisory editorial board who is familiar with the research field. When submitting a manuscript, authors are requested to suggest the names and addresses of three appropriate referees.
- **Communication.** The full postal address, fax number and e-mail address of the corresponding author must be given on the first (title) page of the manuscript.
- **Enquiries.** For specific enquiries on the preparation of electronic artwork, consult http://www.elsevier.com/locate/authorartwork/
  For enquiries relating to the status of accepted articles through our Online Article Status Information System (OASIS), author Frequently Asked Questions and any other enquiries relating to Elsevier Science, please consult http://www.elsevier.com/locate/authors/
  Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided when an article is accepted for publication.

Complete Instructions to Authors are to be found on the last pages of each volume and also at: http://www.elsevier.nl/locate/cplett
Authors employing LaTeX may download the Elsevier LaTeX instruction package from: www.elsevier.nl/locate/latex

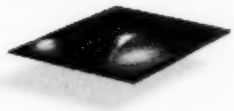
Choose from broad collections of primary journal literature and powerful secondary databases, all deliverable via the Internet or your local Intranet—building blocks for the digital library you need.



SCIENCE DIRECT®

For the Digital Library You Want

ScienceDirect offers desktop access to over 1 million articles published in nearly 1,200 journals spanning 16 fields of science and provides researchers with some 2 million bibliographic citations and abstracts. Access may also be provided to an additional 30 million abstracts via ScienceDirect's secondary databases.

Unprecedented content, navigability and customization options
Whether you choose the breadth of the ScienceDirect multi-publisher platform or one of our discipline or industry-focused solutions, you'll be providing your institution with a dynamic, efficient and integrated solution to access the world's critical STM literature.
